

PLUMBING | LUBRICANTS | VINOLEO/GREASIL

Vinoleo non-toxic grease lubricant is widely used in plumbing applications due to its safety, reliability, and effectiveness. Specially formulated from non-hazardous ingredients, it provides smooth lubrication for pipe fittings, gaskets, and seals without posing risks to human health or contaminating drinking water systems. Its non-toxic nature makes it ideal for use in environments where contact with potable water is possible.

Vinoleo reduces friction, prevents wear, and helps create watertight seals, extending the life of plumbing components while allowing for easier assembly and disassembly. In addition, its resistance to water washout ensures long-lasting performance, making it the trusted choice for both residential and commercial plumbing tasks.

VINOLEO WT90

Domestic and industrial non-toxic tap and valve lubricant
Excellent with hot & cold water and steam

GREASIL silicon

Domestic and industrial silicon based non-toxic tap and valve
lubricant. Excellent with hot & cold water and steam.

Greasil 4000 is a non-toxic, silicone-based lubricant widely used in plumbing for its safety, durability, and high performance. Designed to be compatible with potable water systems, it provides excellent lubrication for rubber seals, O-rings, valves, and gaskets without risk of contamination. Its silicone base ensures long-lasting resistance to water washout, extreme temperatures, and chemical exposure, making it highly reliable in both residential and industrial plumbing applications.

Greasil 4000 not only reduces friction and wear but also assists in creating tight, leak-free seals, allowing for easier installation and maintenance of fittings. Its non-toxic formulation and stability make it a preferred choice where safety and hygiene are critical.
